

## Linea Frameworks

Linea Frameworks is an established route into Public Sector bodies for Associate Consultants wishing to develop known business opportunities, but who do not necessarily have the profile, contacts or time required to successfully pursue or secure contracts themselves through normal, often lengthy and complex channels.

The scheme is based on our continuing relationship with the Public Sector as an approved supplier of services across a number of prominent frameworks.

We provide a vehicle from Associates to more readily progress Public Sector opportunities known to them, in partnership with Linea and under any one of the current Linea Frameworks.

### Linea Frameworks and Public Sector Clients

Public Sector clients benefit from the knowledge that Linea and its Associates have

- Assured operating standards
- A validated track record for delivering results
- An OJEU compliant, flexible, on-demand service
- A pre-approved 'no red tape' buying process for services

### Linea Frameworks and Associates

Associates benefit from the scheme through

- A simple, direct and cost effective route to Public Sector clients
- Access to a wider range of Public Sector opportunities
- A more senior and influential role with the client as a direct provider
- Financial incentives for additional / subsequent framework contracts under the Linea Rewards Scheme
